this war on mine MOD APK for Android (Latest version) Home»Games»Simulation»This war on mine humanity is the most complicated thing in this world, it has two sides of light and dark. As you face the relentless war you choose to survive or morally? - APKAward.com nature is the most complicated thing in the world, with both sides of light and darkness. Bit StudPhone, a game developer from Poland, took advantage of this to create a war on mine, a horizontal war game that challenges the bottom line. The gameplay took place in the Bosnian war of 1992-1995, where players did not play well-prepared soldiers, but innocent refugees who were subjected to relentless fire. If you want to survive this war, you will have to make every attempt to find all the available resources in this shattered city. The game comes from life, system settings close to the real, the game started in a ruinous house, the player to help the three survivors survive in War. Although the house has been there are some things you need to start the game, select one of the three characters, and click on the palmprint icon in the house to dig up some useful things. These props can be used to make some everyday needs, in view of the material deficiency, and the game should not start to save the progress of the kit, so that step by step every step of the way, for fear of something wrong. The system of life in the game is very close to reality, over time, survivors will have living needs such as sleeping, eating and drinking. The survivors are not briefly violent, and if they do not give them food in time, or do not sleep and rest, they will lose temper and flee the home. Even if mood swings occur, every time after robbery, murder, the hero will have a mood of depression in negative emotions, but also only with drinking to worry about solving psychological problems. Such a realistic set, naturally easier for players to put themselves in the game. The role of different strengths and different choices, the game, the role of choice is very important. During the day, survivors can stay only in the activities of the house, in the evening is the highlight of the game. When the night comes, the player can sneak into the city to look for deliveries, this time, a reasonable choice to come up with a role will seriously affect the amount of revenue. For example, Katya, a reporter, is good at bargaining and can always buy a large amount of goods at a low price. Boris, although slowly walking, has more blood and endurance, along with a large backpack of 17, making him a hit Candidate Almost all the unique features of each role, it is easy to see that developers under a lot of effort here, using different combinations of roles, the game or difficulty are very different, for the game plus points less. There are many areas in the city, every night you can choose only one of the survey, but the map is also very caring, there is something in each area there is a text description. Surviving over morality, or dying rather than the heart, when they enter the city, players have to make difficult choices over and over again. There are many ways to get supplies in cities, exchange them equally with traders, or sneak into other people's homes and steal supplies. It's a more relaxed choice. Of course, this is not fulfilled at all times, and when it does not have enough to do, you may need to consider the use of violence. How would you choose? One of the forum's players described what had happened to him: he walked into the room and saw two defenceless pensioners, but he was almost starving, and in order to survive, he had to choose all the deliveries taken away, but when he left, the two old men still did not respond, they seemed indifferent. After the incident, he blamed finally did, and when he remembered, he would have been annoyed a long time ago. It follows that the game is virtual, but sad emotions actually come true in our hearts. Not alive is not a win, the choice can be more than one, the player in the game to do everything, will be saved by the system to help survivors survive until the 45th day, the system will be based on the condition of each survivor to complete the sentence. At the same time, players will also appear in this time period, all appearing again in front of the player. This summary looks like the player is silent about the guilt they have committed, but also allows the player to rethink the wrong behavior, at the moment, can only do it? Every player's choice in the game is subject to moral torment. If you want to survive, you have to resort to all kinds of means, or you have to starve to death. If you want to help other survivors, you need to pay for materials that are only needed. Then the result will probably help others and die. Or a chaperone. But I'm not the devil, it's all just to survive. Black and white images telling the relentless war, if only from the point of view of the game, all the games in the game around survival and set, from everyday, everyday needs and tools, material collection, Personnel with different systems blocking, irreplaceable. The main colors on the game screen only black and white, but it is so true that the tragic scene of the war years. Although this game does not give the player much fun in the gameplay, demand for deliveries blindly occupies most of the game, especially as the last part of the game becomes more and more repetitive. However, the history of the game to allow players to deeply trap in them, and even themselves as a survivor, people can be described as love and. He warned the world with a pale picture: no matter how strong the war, there will always be a darker figure in the ruins playing bloody nature, helplessly watching the fall of life. Life.
